

## **Lesson Two: Academic and Scientific Communication Skills**

### **Aims and Objectives**

#### **Objectives:**

- 1. To enhance students' awareness of non-verbal communication cues, including body movement and eye contact, in academic and scientific settings.**
- 2. To develop students' proficiency in using body language effectively to convey confidence and engagement during presentations and discussions.**
- 3. To emphasize the importance of maintaining appropriate eye contact to establish rapport, credibility, and active listening in academic and scientific communication.**

#### **Aims:**

- 1. Foster effective non-verbal communication skills among students to improve their overall academic and scientific communication competence.**
- 2. Encourage students to use body language and eye contact as tools for conveying professionalism and engaging their audience.**
- 3. Highlight the role of clear and confident communication in promoting collaboration, understanding, and knowledge dissemination in academic and scientific communities.**
