Educational Technology

(Module Content and Introduction)

Prepared by:

Pr. Khatout Ramdhane

ramdane.khatout@univ-msila.dz

INTRODUCTION

Education is a very important and integral part of society that governs the social functioning. It deeply connects with the wants and ambitions of every society. This is the reason that education cannot remain unaffected by any social change that takes place around us. Hence, any advancement in technology has a direct or indirect impact on the methodology of education in the current scenario.

INTRODUCTION

In general, there is active participation and involvement of radio, television, computers, machines, films, and now the Internet and multimedia, in providing education and educational material to students. This is referred to as educational technology. The significance of educational technology has increased due to its capability to achieve desired goals related to making education universal, preparing teachers and upgrading curricula in every phase of education.

INTRODUCTION

Educational Technology (ET) is the efficient organization of any learning system adopting or adapting itself to methods, processes, and products to serve identified educational goals. This involves systematic identification of the goals of education, recognition of the diversity of learners' needs, the contexts in which learning will take place, and the range of provisions needed for each of these. The challenge is to design appropriate systems that will provide for and enable appropriate teaching-learning systems that could realise the identified goals. The key to meeting this challenge is an appreciation of the role of educational technology as an agent of change in the classroom, which includes not only the teacher and the teaching- learning process but also systemic issues like reach, equity, and quality.

Module content:

Level: 3rd Year Guidance and Counseling.

Module: Educational Technology.

Semestre: fifth

Education objectives:

- ❖ Learn about the benefits of using educational technology in developing and improving the educational process.
- ❖ Learn about new trends in communication media and educational technology.

Prior knowledges required:

- ❖ The student should have some information about the concept of educational methods.
- ❖ The student should have some information about some of the technological means used in education.

Module content:

Module content:

- ❖ Definition of educational technology.
- ❖ Objectives of educational technology.
- ❖ The importance of educational technology in the teaching-learning process.
- ❖ Foundations of using educational technology.
- ❖ Types of educational media.
- ❖ Teaching and learning through modern technological means of communication.
- ❖ New trends in communication and educational technology.

Evaluation method: Written exam at the end of the semester
