
Objective:

The English course aims to learn the basics of the English language and promote skills exchange and expression, based on texts containing scientific and technical parts based on the vocabulary acquired, for better understanding, as well as the translation of certain words from English to Arabic.

The module “foreign language” is divided into a set of learning units which allow students to read, understand and summarize a scientific text in their academic field.

Building a **vocabulary** specifically for management projects involves understanding and mastering terms and phrases commonly used in project management contexts. Here's a selection of vocabulary categorized by different aspects of project management:

- Drawing: الرسم
- computer assisted drawing: الرسم بمساعدة الكمبيوتر
- urban planning: التهيئة العمرانية
- design : التصميم
- Engineering : الهندسة
- Site: الموقع
- construction project: مشروع بناء
- project budget: ميزانية مشروع
- benefits and disadvantages: المحاسن و المساوىء
