

By following this structured approach and integrating relevant content and activities, students can develop practical English language skills essential for success in management projects.

- **Project lifecycle phases:**

Source: <https://www.constructionplacements.com/phases-of-the-construction-project-life-cycle/>

1. **Initiation**: This is the stage where the project is proposed and its objectives and scope are defined.
2. **Planning**: In this stage, a detailed plan for the project is developed, including a schedule, budget, and resource requirements.
3. **Execution**: This is the stage where the project is carried out and the work is completed.
4. **Monitoring and Control**: During this stage, progress is monitored and any necessary adjustments are made to keep the project on track.
5. **Closure**: This is the final stage in which the project is completed and evaluated, and any final deliverables are handed over to the customer.
