M'sila University, Department of Computer Science, ISIL

COURSE: DISTRIBUTED INFORMATION SYSTEMS   **DR. R. BENTRCIA**

TP 1: HTTP PROTOCOL

Required software:

- Java Software Development Kit (jdk 1.8 or later)
- Local web server: Apache Tomcat 9.0
- Web browser: Internet Explorer/…
- HTML editor: Notepad/…

Exercise 1:

1. Open your editor.
2. Write your first HTML page which displays "Welcome to the course of Distributed Information Systems! "
3. Save the page as myFirstPage.html
4. Start Tomcat server.
5. Verify that the server is running by opening http://localhost:8080 in your browser.
6. Create a folder inside tomcat/webapps/   and name it app1.
7. Move your page to the folder app1.
8. Type this address in the browser to see the webpage:
   http://localhost:8080 /app1/myFirstPage.html

Exercise 2:

1. Open a new Notepad file.
2. Using HTML, display an image of your choice that has a border size 5, a width of 200, and a height of 200.
3. Add a title and an alternative text for the image.
4. Save the page as myImage.html
5. Run Tomcat server and move the page and the image to the folder app1 created before.
6. Type this address in the browser to see the webpage:
   http://localhost:8080 /app1/myImage.html
